Gwynedd Pension Fund
Funding Strategy Statement
March 2023

Contents

1 Welcome to our Funding Strategy Statement

This document sets out the Funding Strategy Statement (FSS) for Gwynedd Pension Fund.

The Gwynedd Pension Fund is administered by Cyngor Gwynedd, known as the administering authority. Gwynedd Council worked with the Fund's actuary, Hymans Robertson, to prepare this FSS which is effective from 27th March 2023.

There's a regulatory requirement for Gwynedd Council to prepare an FSS. You can find out more about the regulatory framework in Appendix A. If you have any queries about the FSS, contact delythwynjonesthomas@gwynedd.llyw.cymru.

1.1 What is the Gwynedd Pension Fund?

The Gwynedd Pension Fund is part of the Local Government Pension Scheme (LGPS). You can find more information about the LGPS at www.lgpsmember.org. The administering authority runs the Fund on behalf of participating employers, their employees and current and future pensioners. You can find out more about roles and responsibilities in Appendix B.

1.2 What are the funding strategy objectives?

The funding strategy objectives are to:

- take a prudent long-term view to secure the regulatory requirement for long-term solvency, with sufficient funds to pay benefits to members and their dependants
- use a balanced investment strategy to minimise long-term cash contributions from employers and meet the regulatory requirement for long-term cost efficiency
- where appropriate, ensure stable employer contribution rates
- reflect different employers' characteristics to set their contribution rates, using a transparent funding strategy
- use reasonable measures to reduce the risk of an employer defaulting on its pension obligations.

1.3 Who is the FSS for?

The FSS is mainly for employers participating in the Fund, because it sets out how money will be collected from them to meet the Fund's obligations to pay members' benefits.

Different types of employers participate in the Fund:

Scheduled bodies
Employers who are specified in a schedule to the LGPS regulations, such as councils. Scheduled bodies must give employees access to the LGPS if they can't accrue benefits in another pension scheme, such as another public service pension scheme.

Designating employers
Employers like town and parish councils can join the LGPS through a resolution. If a resolution is passed, the Fund can't refuse entry. The employer then decides which employees can join the scheme.

Admission bodies
Other employers can join through an admission agreement. The Fund can set participation criteria for them and can refuse entry if the requirements aren't met. This type of employer includes contractors providing outsourced services like cleaning or catering to a scheduled body.

Some existing employers may be referred to as **community admission bodies** (CABs). CABs are employers with a community of interest with another scheme employer. Others may be called **transferee admission bodies** (TABs), that provide services for scheme employers. These terms aren't defined under current regulations but remain in common use from previous regulations.

1.4 How does the funding strategy link to the investment strategy?

The funding strategy sets out how money will be collected from employers to meet the Fund's obligations. Contributions, assets and other income are then invested according to an investment strategy set by the administering authority. You can find the investment strategy at www.gwyneddpensionfund.wales.

The funding and investment strategies are closely linked. The Fund must be able to pay benefits when they are due – those payments are met from a combination of contributions (through the funding strategy) and asset returns and income (through the investment strategy). If investment returns or income fall short the Fund won't be able to pay benefits, so higher contributions would be required from employers. Both strategies also consider the Fund's Responsible Investment beliefs and policy.

1.5 Does the funding strategy reflect the investment strategy?

The funding policy is consistent with the investment strategy. Future investment return expectations are set with reference to the investment strategy, including a margin for prudence which is consistent with the regulatory requirement that funds take a 'prudent longer-term view' of funding liabilities (see Appendix A)

1.6 How is the funding strategy specific to the Gwynedd Pension Fund?

The funding strategy reflects the specific characteristics of the Fund employers and its own investment strategy.

2 How does the Fund calculate employer contributions?

2.1 Calculating contribution rates

Employee contribution rates are set by the LGPS regulations.

Employer contributions are made up of two elements:

- **the primary contribution rate** – contributions payable towards future benefits
- **the secondary contribution rate** – the difference between the primary rate and the total employer contribution

The primary rate also includes an allowance for the Fund's expenses.

The Fund actuary uses a model to project each employer's asset share over a range of future economic scenarios. The contribution rate takes each employer's assets into account as well as the projected benefits due to their members. The value of the projected benefits is worked out using employer membership data and the assumptions in Appendix D.

The total contribution rate for each employer is then based on:

- **the funding target** – how much money the Fund aims to hold for each employer
- **the time horizon** – the time over which the employer aims to achieve the funding target
- **the likelihood of success** – the proportion of modelled scenarios where the funding target is met.

This approach takes into account the maturing profile of the membership when setting employer contribution rates.

The Fund permits the prepayment of employer contributions in specific circumstances. The Fund's policy on prepayments is detailed in **Appendix E**.

2.2 The contribution rate calculation

Table 1: contribution rate calculation for individual or pooled employers

Type of employer	Scheduled bodies		Colleges, Community Admission Bodies and Designating Employers		Transferee Admission Bodies
Sub-type	**Local Authorities, Police and Parc Cenedlaethol Eryri**	**Parish & town councils**	**Open to new entrants**	**Closed to new entrants**	**(all)**
Funding target*	Ongoing participation basis, assumes long-term Fund participation	Ongoing participation basis, assumes long-term Fund participation	Ongoing participation basis, but may move to low-risk exit basis		Contractor exit basis, assuming fixed-term contract in the Fund
Minimum likelihood of success	70%	75%	75%	75%	75%
Maximum time horizon	17 years	17 years	14 years	14 years or average future working lifetime, if less	Outstanding contract term
Primary rate approach	The contributions must be sufficient to meet the cost of benefits earned in the future with the required likelihood of success at the end of the time horizon				
Secondary rate	Percentage of pay				
Stabilised contribution rate?	Yes	No	No	No	No
Treatment of surplus	Covered by stabilisation arrangement	Reduce contributions through a negative secondary rate	Reduce contributions through a negative secondary rate		Reduce contributions by spreading the surplus over the remaining contract term
Phasing of contribution changes	Covered by stabilisation arrangement	3 years	3 years	3 years	None

* Employers participating in the Fund under a pass-through agreement will pay a contribution rate as agreed between the contractor and letting authority

** See Appendix D for further information on funding targets.

2.3 Making contribution rates stable

Making employer contribution rates reasonably stable is an important funding objective. Where appropriate, contributions are set with this objective in mind. The Fund adopts a stabilised approach to setting contributions for certain employers, which either

- keeps contribution variations within a pre-determined range from year-to-year, or
- dampens contribution rate volatility over time via a phasing mechanism

After taking advice from the Fund actuary, the administering authority believes a stabilised approach is a prudent longer-term strategy for the Fund’s local authorities, police body and Parc Cenedlaethol Eryri.

For these bodies, the Fund sets pre-determined ranges for contribution variations. For the 2022 valuation, it has been agreed that all stabilised employers are subject to rate reductions that are linked to their 2022 primary rates. The extent of the reduction depends on the 2022 funding level (i.e. no reduction if funded below 110%, a 1.0% reduction if funded between 110% and 115%, a 2.0% reduction if funded between 115% and 130%, and a 3.0% reduction if funded above 130%).

The longer-term movements in contribution rates are subject to the following rules:

Table 2: contribution variations for stabilised employers

Type of employer	Local Authorities, Police and Parc Cenedlaethol Eryri
Maximum contribution increase per year	+1.0% of pay
Maximum contribution decrease per year	-1.0% of pay

Increases and reductions to rates for open admitted bodies are subject to a phasing mechanism. For the 2022 valuation, this is determined by calculating the difference in total rates at 2019 and 2022 before application of the mechanism, and then restricting the subsequent increase or reduction as follows: a) if the difference is 5.0% or less of pay, the rate will change by the full difference, or b) if the difference is more than 5.0% of pay, then the rate will change by 5.0% plus half of the difference above 5.0%.

Rate reductions for stabilised employers, and those employers that are subject to the phasing mechanism, will apply in full from 2023/24. Any increases in rates will be phased in over a 3-year period.

Eligibility for the stabilisation approach and the phasing mechanism, and the numerical limits, are reviewed during each triennial valuation process. The administering authority may also review them between valuations to respond to membership or employer changes.

2.4 Reviewing contributions between valuations

The Fund may amend contribution rates between formal valuations, in line with its policy on contribution reviews. The Fund’s policy is available in **Appendix F**. The purpose of any review is to establish the most appropriate contributions. A review may lead to an increase or decrease in contributions.

2.5 Are any employers pooled?

The administering authority does not currently operate formal contribution rate pools for similar types of employers.

The only employers that may be pooled are those that have a pass-through or other form of risk sharing agreement in place with a letting authority. The Fund’s pass-through policy is detailed in **Appendix G**.

2.6 Administering authority discretion

Individual employers may be affected by circumstances not easily managed within the FSS rules and policies. If this happens, the administering authority may adopt alternative funding approaches on a case-by-case basis.

Additionally, the administering authority may allow greater flexibility to the employer’s contributions if added security is provided. Flexibility could include things like a reduced contribution rate, extended time horizon, or permission to join a pool. Added security may include a suitable bond, a legally binding guarantee from an appropriate third party, or security over an asset.

The Fund permits the prepayment of employer contributions in specific circumstances. Further details are set out in the Fund's prepayment policy detailed in **Appendix E**.

3 What additional contributions may be payable?

3.1 Pension costs – awarding additional pension and early retirement on non ill-health grounds

If an employer awards additional pension as an annual benefit amount, they pay an additional contribution to the fund as a single lump sum. The amount is set by guidance issued by the Government Actuary's Department and updated from time to time.

If an employee retires before their normal retirement age on unreduced benefits, employers may be asked to pay additional contributions called strain payments.

Employers typically make strain payments as a single lump sum, though strain payments may be spread if the administering authority agrees:

Major employing bodies	- up to 5 years
Community Admission Bodies and designating employers	- up to 3 years
Transferee Admission Bodies	- payable immediately

3.2 Pension costs – early retirement on ill-health grounds

If a member retires early because of ill-health, their employer must pay a funding strain, which may be a large sum.

The administering authority has arranged an external insurance policy to cover ill-health early retirement strains for smaller employers. Each employer's contribution includes a share of the premium. When an active member retires on ill-health early retirement, the claim amount is credited to the employer's asset share.

For other employers, each employer's contributions include an allowance for expected ill health strain costs. These costs are monitored as part of the triennial valuation process.

The Fund's policy is detailed in **Appendix H**.

4 How does the Fund calculate assets and liabilities?

4.1 How are employer asset shares calculated?

The Fund adopts a cashflow approach to track individual employer assets.

The fund uses Hymans Robertson's HEAT system to track employer assets monthly. Each employer's assets from the previous month end are added to monthly cashflows paid in/out and investment returns to give a new month-end asset value.

If an employee moves from one employer to another within the Fund, assets equal to the cash equivalent transfer value (CETV) will move from the original employer to the receiving employer's asset share.

Alternatively, if employees move when an outsourced contract begins, the Fund actuary will calculate assets linked to the value of the liabilities transferring (see section 5).

4.2 How are employer liabilities calculated?

The Fund holds membership data for all active, deferred and pensioner members. Based on this data and the assumptions in Appendix D, the Fund actuary projects the expected benefits for all members into the future. This is expressed as a single value – the liabilities – by allowing for expected future investment returns.

Each employer's liabilities reflect the experience of their own employees and ex-employees.

4.3 What is a funding level?

An employer's funding level is the ratio of the market value of asset share against liabilities. If this is less than 100%, the employer has a shortfall: the employer's deficit. If it is more than 100%, the employer is in surplus. The amount of deficit or surplus is the difference between the asset value and the liabilities value.

Funding levels and deficit/surplus values measure a particular point in time, based on a particular set of future assumptions. While this measure is of interest, for most employers the main issue is the level of contributions payable. The funding level does not directly drive contribution rates. See section 2 for further information on rates.

5 What happens when an employer joins the Fund?

5.1 When can an employer join the Fund

Employers can join the Fund if they are a new scheduled body or a new admission body. New designating employers may also join the Fund if they pass a resolution to do so.

On joining, the Fund will determine the assets and liabilities for that employer within the Fund. The calculation will depend on the type of employer and the circumstances of joining.

A contribution rate will also be set. This will be set in accordance with the calculation set out in Section 2, unless alternative arrangements apply (for example, the employer has agreed a pass-through arrangement). More details on this are in Section 5.2 below.

5.2 New admission bodies as a result of outsourcing services

New admission bodies usually join the Fund because an existing employer (usually a scheduled body like a council) outsources a service to another organisation (a contractor). This involves TUPE transfers of staff from the letting authority to the contractor. The contractor becomes a new participating Fund employer for the duration of the contract and transferring employees remain eligible for LGPS membership. At the end of the contract, employees typically revert to the letting authority or a replacement contractor.

Liabilities for transferring active members will be calculated by the Fund actuary on the day before the outsourcing occurs.

New contractors will be allocated an asset share equal to the value of the transferring liabilities. The admission agreement may set a different initial asset allocation, depending on contract-specific circumstances.

There is flexibility for outsourcing employers when it comes to pension risk potentially taken on by the contractor. You can find more details on outsourcing options from the administering authority or in the contract admission agreement.

The Fund's policy is to allow all new admission bodies to be set up with a pass-through arrangement, at the discretion of the letting authority. The Fund's policy on pass through is detailed in **Appendix G**.

5.3 Other new employers

There may be other circumstances that lead to a new admission body entering the Fund, eg set up of a wholly owned subsidiary company by a Local Authority. Calculation of assets and liabilities on joining and a contribution rate will be carried out allowing for the circumstances of the new employer.

New designating employers may also join the Fund. These are usually town and parish councils. Contribution rates will be set using the same approach as other designating employers in the Fund.

5.4 Risk assessment for new admission bodies

Under the LGPS regulations, a new admission body must assess the risks it poses to the Fund if the admission agreement ends early, for example if the admission body becomes insolvent or goes out of business. In practice, the Fund actuary assesses this because the assessment must be carried out to the administering authority's satisfaction.

After considering the assessment, the administering authority may decide the admission body must provide security, such as a guarantee from the letting employer, an indemnity or a bond.

This must cover some or all of the:

- strain costs of any early retirements, if employees are made redundant when a contract ends prematurely

- allowance for the risk of assets performing less well than expected
- allowance for the risk of liabilities being greater than expected
- allowance for the possible non-payment of employer and member contributions
- admission body's existing deficit.

The Fund will assess an employer's own unique circumstances when considering whether the body can be admitted to the Fund. This will take into account the above considerations.

The regulations state that an administering authority may make an admission agreement with any body falling under Schedule 2 Part 3 1(d (i) (previously known as a transferee admission body). In addition to the requirements within the regulations, the Fund will put in place an admission agreement. The terms of admission will need to be agreed by all three parties to the admission agreement - the Scheme Employer, the admission body and Gwynedd Council in its capacity as administrator of the Fund.

The regulations also state that an administering authority may make an admission agreement with any body falling under Schedule 2 Part 3 1 (a) (previously known as community admission bodies). In addition to the requirements given within the regulations, the Fund will put in place an admission agreement where a local authority has agreed to act as guarantor, and as such it will be a party to the admission agreement.

If the administering authority deems it appropriate to admit a new body to the Fund, an admission agreement will be put in place which covers that employer's specific circumstances.

Some of the key issues which will need to be agreed prior to admitting a new employer to the Fund include:

- The terms upon which the admitted body can be admitted to the Fund
- Details of any members who are eligible to transfer to the admitted body
- The approach for allocating assets to the admitted body and setting contributions
- Whether any guarantee or indemnity is required
- How frequently ongoing monitoring of the funding position is carried out
- The basis upon which any termination valuation will be carried out
- Details of any risk sharing or pass-through agreement, including whether the admitted body may be eligible for an exit credit.
- If the admitted body is eligible to have a pooled contribution rate, how this will be set
- The recovery of ill health and early retirement costs

The purpose of the administering authority's consideration is to reduce the risk of cross-subsidy of liabilities between employers, and to try and ensure the security of employers which participate in the Fund.

6 What happens if an employer has a bulk transfer of staff?

Bulk transfer cases will be looked at individually, but generally:

- The Fund won't pay bulk transfers greater in value than either the asset share of the transferring employer in the Fund, or the value of the liabilities of the transferring members, whichever is lower
- the Fund won't grant added benefits to members bringing in entitlements from another fund, unless the asset transfer is enough to meet the added liabilities
- the Fund may permit shortfalls on bulk transfers if the employer has a suitable covenant and commits to meeting the shortfall in an appropriate period, which may require increased contributions between valuations.

7 What happens when an employer leaves the Fund?

7.1 What is a cessation event?

Triggers for considering cessation from the Fund are:

- the last active member stops participation in the Fund. The administering authority, at their discretion, can defer acting for up to three years by issuing a suspension notice. That means cessation won't be triggered if the employer takes on one or more active members during the agreed time
- insolvency, winding up or liquidation of the body
- a breach of any admission agreement obligations that isn't remedied to the Fund's satisfaction
- failure to pay any sums due within the period required
- failure to renew or adjust the level of a bond or indemnity, or to confirm an appropriate alternative guarantor
- termination of a deferred debt arrangement (DDA).

If no DDA exists, the administering authority will instruct the Fund actuary to carry out a cessation valuation to calculate if there is a surplus or a deficit when the employer leaves the Fund.

7.2 What happens on cessation?

The administering authority must protect the interests of the remaining Fund employers when an employer leaves the scheme. The actuary aims to protect remaining employers from the risk of future loss. The funding target adopted for the cessation calculation is below. These are defined in Appendix D.

(a) Where there is no guarantor, cessation liabilities and a final surplus/deficit will usually be calculated using a low-risk basis, which is more prudent than the ongoing participation basis. The low-risk exit basis is defined in Appendix D.

(b) Where there is a guarantor, the guarantee will be considered before the cessation valuation. Where the guarantor is a guarantor of last resort, this will have no effect on the cessation valuation. If this isn't the case, cessation may be calculated using the same basis that was used to calculate liabilities (and the corresponding asset share) on joining the Fund.

(c) Depending on the guarantee, it may be possible to transfer the employer's liabilities and assets to the guarantor without crystallising deficits or surplus. This may happen if an employer can't pay the contributions due and the approach is within guarantee terms.

If the Fund can't recover the required payment in full, unpaid amounts will be paid by the related letting authority (in the case of a ceased admission body) or shared between the other Fund employers. This may require an immediate revision to the Rates and Adjustments certificate or be reflected in the contribution rates set at the next formal valuation.

The Fund actuary charges a fee for cessation valuations and there may be other cessation expenses. Fees and expenses are at the employer's expense and are deducted from the cessation surplus or added to the cessation deficit. This improves efficiency by reducing transactions between employer and Fund.

The cessation policy is in **Appendix I**.

7.3 What happens if there is a surplus?

If the cessation valuation shows the exiting employer has more assets than liabilities – an exit credit – the administering authority can decide how much will be paid back to the employer based on:

- the surplus amount
- the proportion of the surplus due to the employer's contributions
- any representations (like risk sharing agreements or guarantees) made by the exiting employer and any employer providing a guarantee or some other form of employer assistance/support
- any other relevant factors.

The Fund's approach to exit credits is detailed in the cessation policy in **Appendix I**.

7.4 How do employers repay cessation debts?

If there is a deficit, full payment will usually be expected in a single lump sum or:

- spread over an agreed period, if the employer enters into a deferred spreading agreement (DSA)
- if an exiting employer enters into a deferred debt arrangement, it stays in the Fund and pays contributions until the cessation debt is repaid. Payments are reassessed at each formal valuation.

The employer flexibility on exit policy is detailed in the cessation policy in **Appendix I**.

7.5 What if an employer has no active members?

When employers leave the Fund because their last active member has left, they may pay a cessation debt, receive an exit credit or enter a DDA/DSA. Beyond this they have no further obligation to the Fund and either:

a) their asset share runs out before all ex-employees' benefits have been paid. The other Fund employers will be required to contribute to the remaining benefits. The Fund actuary will portion the liabilities on a pro-rata basis at successive formal valuations.

b) the last ex-employee or dependant dies before the employer's asset share is fully run down. The fund actuary will apportion the remaining assets to the other Fund employers on a pro-rata basis.

8 What are the statutory reporting requirements?

8.1 Reporting regulations

The Public Service Pensions Act 2013 requires the Government Actuary's Department to report on LGPS funds in England and Wales after every three-year valuation, in what's usually called a section 13 report. The report should include confirmation that employer contributions are set at the right level to ensure the Fund's solvency and long-term cost efficiency.

8.2 Solvency

Employer contributions are set at an appropriate solvency level if the rate of contribution targets a funding level of 100% over an appropriate time, using appropriate assumptions compared to other funds. Either:

(a) employers collectively can increase their contributions, or the Fund can realise contingencies to target a 100% funding level

or

(b) there is an appropriate plan in place if there is, or is expected to be, a reduction in employers' ability to increase contributions as needed.

8.3 Long-term cost efficiency

Employer contributions are set at an appropriate long-term cost efficiency level if the contribution rate makes provision for the cost of current benefit accrual, with an appropriate adjustment for any surplus or deficit.

To assess this, the administering authority may consider absolute and relative factors.

Relative factors include:

1. comparing LGPS funds with each other
2. the implied deficit recovery period
3. the investment return required to achieve full funding after 20 years.

Absolute factors include:

1. comparing funds with an objective benchmark
2. the extent to which contributions will cover the cost of current benefit accrual and interest on any deficit
3. how the required investment return under relative considerations compares to the estimated future return targeted by the investment strategy
4. the extent to which contributions paid are in line with expected contributions, based on the Rates and Adjustments certificate
5. how any new deficit recovery plan reconciles with, and can be a continuation of, any previous deficit recovery plan, allowing for Fund experience.

These metrics may be assessed by GAD on a standardised market-related basis where the Fund's actuarial bases don't offer straightforward comparisons.

Appendices

Appendix A – The regulatory framework

A1 Why do funds need a funding strategy statement?
The Local Government Pension Scheme (LGPS) regulations require funds to maintain and publish a funding strategy statement (FSS). According to the Department for Levelling Up, Housing and Communities (DLUHC) the purpose of the FSS is to document the processes the administering authority uses to:

- *establish a **clear and transparent fund-specific strategy** identifying how employers' pension liabilities are best met going forward*
- *support the regulatory framework to maintain **as nearly constant employer contribution rates as possible***
- *ensure the Fund meets its **solvency and long-term cost efficiency** objectives*
- *take a **prudent longer-term view** of funding those liabilities.*

To prepare this FSS, the administering authority has used guidance from the Chartered Institute of Public Finance and Accountancy (CIPFA).

A2 Consultation
Both the LGPS regulations and most recent CIPFA guidance state the FSS should be prepared in consultation with "*persons the authority considers appropriate*". This should include '*meaningful dialogue… with council tax raising authorities and representatives of other participating employers*'.

In practice, for the Fund, the consultation process for this FSS was as follows:

- A draft version of the FSS was issued to all participating employers in January 2023 for comment;
- Comments were requested within 42 days;
- Following the end of the consultation period the FSS was updated where required and then published, in March.

A3 How is the FSS published?
The FSS is made available through the following routes:
- Published on the website
- A copy sent by e-mail to each participating employer in the Fund;
- A full copy linked from the annual report and accounts of the Fund;
- Copies made available on request.

The FSS is published at Funding Strategy Statement (gwyneddpensionfund.wales) .

A4 How often is the FSS reviewed?
The FSS is reviewed in detail at least every three years as part of the valuation. Amendments may be made before then if there are regulatory or operational changes. Any amendments will be consulted on, agreed by the Pensions Committee and included in the Committee meeting minutes.

A5 How does the FSS fit into the overall Fund documentation?

The FSS is a summary of the Fund's approach to funding liabilities. It isn't exhaustive – the Fund publishes other statements like the investment strategy statement, governance policy statement and communication policy statement. The Fund's annual report and accounts also includes up-to-date Fund information.

You can see all Fund documentation at Home (gwyneddpensionfund.wales).

Appendix B – Roles and responsibilities

B1 The administering authority:

1 operates the Fund and follows all Local Government Pension Scheme (LGPS) regulations

2 manages any conflicts of interest from its dual role as administering authority and a Fund employer

3 collects employer and employee contributions, investment income and other amounts due

4 ensures cash is available to meet benefit payments when due

5 pays all benefits and entitlements

6 invests surplus money like contributions and income which isn't needed to pay immediate benefits, in line with regulation and the investment strategy

7 communicates with employers so they understand their obligations

8 safeguards the Fund against employer default

9 works with the Fund actuary to manage the valuation process

10 provides information to the Government Actuary's Department so they can carry out their statutory obligations

11 consults on, prepares and maintains the funding and investment strategy statements

12 tells the actuary about changes which could affect funding

13 monitors the Fund's performance and funding, amending the strategy statements as necessary

14 enables the local pension board to review the valuation process.

B2 Individual employers:

1 deduct the correct contributions from employees' pay

2 pay all contributions by the due date

3 have appropriate policies in place to work within the regulatory framework

4 make additional contributions as agreed, for example to augment scheme benefits or early retirement strain

5 tell the administering authority promptly about any changes to circumstances, prospects or membership which could affect future funding.

6 make any required exit payments when leaving the Fund.

B3 The Fund actuary:

1 prepares valuations, including setting employers' contribution rates, agreeing assumptions, working within FSS and LGPS regulations and appropriately targeting fund solvency and long-term cost efficiency

2 provides information to the Government Actuary's Department so they can carry out their statutory obligations

3 advises on fund employers, including giving advice about and monitoring bonds or other security

4 prepares advice and calculations around bulk transfers and individual benefits

5 assists the administering authority to consider changes to employer contributions between formal valuations

6 advises on terminating employers' participation in the Fund

7 fully reflects actuarial professional guidance and requirements in all advice.

B4 Other parties:

1 internal and external investment advisers ensure the investment Strategy Statement (ISS) is consistent with the Funding Strategy Statement

2 investment managers, custodians and bankers play their part in the effective investment and dis-investment of Fund assets in line with the ISS

3 auditors comply with standards, ensure Fund compliance with requirements, monitor and advise on fraud detection, and sign-off annual reports and financial statements

4 governance advisers may be asked to advise the administering authority on processes and working methods

5 internal and external legal advisers ensure the Fund complies with all regulations and broader local government requirements, including the administering authority's own procedures

6 the Department for Levelling Up, Housing and Communities, assisted by the Government Actuary's Department and the Scheme Advisory Board, work with LGPS funds to meet Section 13 requirements.

Appendix C – Risks and controls

C1 Managing risks

The administering authority has a risk management programme to identify and control financial, demographic, regulatory and governance risks.

The Pensions Board has an oversight / assisting role not a decision making role, its responsibilities are to:

1. Assist the Gwynedd Pension Fund as Scheme Manager;

2. Securing compliance with regulations and requirements enforced by the Pensions Regulator and the Department for Communities and Local Government

3. Ensuring effective and efficient governance and administration of the Fund.

4. Assist with other matters as the scheme regulations may stipulate.

Details of the key fund-specific risks and controls are set out in the risk register at Risk Register 2021 (gwyneddpensionfund.wales).

C2 Employer covenant assessment and monitoring

Many of the employers participating in the Fund, such as admitted bodies (including TABs and CABs), have no local tax-raising powers. The fund's approach is to review such employers' covenants every 3 years ahead of the formal valuation.

C3 Climate risk and TCFD reporting

The Fund has considered climate-related risks when setting the funding strategy. To consider the resilience of the strategy the Fund has included climate scenario stress testing in the contribution modelling exercise for the local authority employers at the 2022 valuation. The modelling results under the stress tests were slightly worse than the core results but were still within risk tolerance levels, particularly given the severity of the stresses applied. The results provide assurance that the modelling approach does not significantly underestimate the potential impact of climate change and that the funding strategy is resilient to climate risks. The results of these stress tests may be used in future to assist with disclosures prepared in line with Task Force on Climate-Related Financial Disclosures (TCFD) principles.

The same stress tests were not applied to the funding strategy modelling for smaller employers. However, given that the same underlying model is used for all employers and that the local authority employers make up the vast majority of the Fund's assets and liabilities, applying the stress tests to all employers was not deemed proportionate at this stage and would not be expected to result in any changes to the agreed contribution plans.

The Fund has a Responsible Investment Policy Framework (Responsible Investment Policy 2022 (gwyneddpensionfund.wales)) of which was agreed by Pensions Committee in 2022.

Appendix D – Actuarial assumptions

The Fund's actuary uses a set of assumptions to determine the strategy, and so assumptions are a fundamental part of the funding strategy statement.

D1 What are assumptions?

Assumptions are used to estimate the benefits due to be paid to members. Financial assumptions determine the amount of benefit to be paid to each member, and the expected investment return on the assets held to meet those benefits. Demographic assumptions are used to work out when benefit payments are made and for how long.

The funding target is the money the Fund aims to hold to meet the benefits earned to date.

Any change in the assumptions will affect the funding target and contribution rate, but different assumptions don't affect the actual benefits the Fund will pay in future.

D2 What assumptions are used to set the contribution rate?

The Fund doesn't rely on a single set of assumptions when setting contribution rates, instead using Hymans Robertson's Economic Scenario Service (ESS) to project each employer's assets, benefits and cashflows to the end of the funding time horizon.

ESS projects future benefit payments, contributions and investment returns under 5,000 possible economic scenarios, using variables for future inflation and investment returns for each asset class, rather than a single fixed value.

For any projection, the fund actuary can assess if the funding target is satisfied at the end of the time horizon.

Table: Summary of assumptions underlying the ESS, 31 March 2022

		Annualised total returns										
		UK Equity	Developed World ex UK Equity	Private Equity	Property	Emerging Markets Equity	Listed Infrastructure Equity	Multi Asset Credit (sub inv grade)	Absolute Return Bonds (inv grade)	Inflation (CPI)	17 year real yield (CPI)	17 year yield
5 years	16th %'ile	-2.7%	-3.2%	-5.0%	-2.5%	-5.9%	-3.5%	0.3%	0.5%	2.3%	-2.2%	1.1%

D3 What financial assumptions were used?

Future investment returns and discount rate

The Fund uses a risk-based approach to generate assumptions about future investment returns over the funding time horizon, based on the investment strategy.

The discount rate is the annual rate of future investment return assumed to be earned on assets after the end of the funding time horizon. The discount rate assumption is set as a margin above the risk-free rate.

Assumptions for future investment returns depend on the funding objective.

	Employer type	Margin above risk-free rate
Ongoing basis	All employers except transferee admission bodies and closed community admission bodies	2.3%
Low-risk exit basis	Community admission bodies closed to new entrants	0%
Contractor exit basis	Transferee admission bodies	Equal to the margin used to allocate assets to the employer on joining the Fund

Discount rate (for funding level calculation as at 31 March 2022 only)

For the purpose of calculating a funding level at the 2022 valuation, a discount rate of 4.1% pa applies. This is based on a prudent estimate of investment returns, specifically, that there is an 75% likelihood that the Fund's assets will generate future investment returns of 4.1% pa over the 20 years following the 2022 valuation date.

Pension increases and CARE revaluation

Deferment and payment increases to pensions and revaluation of CARE benefits are in line with the Consumer Price Index (CPI) and determined by the regulations.

The CPI assumption is based on Hymans Robertson's ESS model. The median value of CPI inflation from the ESS was 2.7% pa on 31 March 2022.

Salary growth

The salary increase assumption at the latest valuation has been set to 0.5% above CPI pa plus a promotional salary scale.

D4 What demographic assumptions were used?

Demographic assumptions are best estimates of future experience. The Fund uses advice from Club Vita to set demographic assumptions, as well as analysis and judgement based on the Fund's experience.

Demographic assumptions vary by type of member, so each employer's own membership profile is reflected in their results.

Life expectancy

The longevity assumptions are a bespoke set of VitaCurves produced by detailed analysis and tailored to fit the fund's membership profile.

Allowance has been made for future improvements to mortality, in line with the 2021 version of the continuous mortality investigation (CMI) published by the actuarial profession. The starting point has been adjusted by +0.25% to reflect the difference between the population-wide data used in the CMI and LGPS membership. A long-term rate of mortality improvements of 1.5% pa applies.

The smoothing parameter used in the CMI model is 7.0. There is little evidence currently available on the long-term effect of Covid-19 on life expectancies. To avoid an undue impact from recently mortality experience on long-term assumptions, no weighting has been placed on data from 2020 and 2021 in the CMI.

Other demographic assumptions	
Retirement in normal health	Members are assumed to retire at the earliest age possible with no pension reduction.
Promotional salary increases	Sample increases below
Death in service	Sample rates below
Withdrawals	Sample rates below
Retirement in ill health	Sample rates below
Family details	A varying proportion of members are assumed to have a dependant partner at retirement or on earlier death. For example, at age 60 this is assumed to be 90% for males and 85% for females. Beyond retirement the proportion is adjusted for assumed dependant mortality. Males are assumed to be 3 years older than females, and partner dependants are assumed to be opposite sex to members.
Commutation	65% of future retirements elect to exchange pension for additional tax-free cash up to the maximum
50:50 option	0.5% of members will choose the 50:50 option.

D3 Rates for demographic assumptions

D5 What assumptions apply in a cessation valuation following an employer's exit from the Fund?
Low-risk exit basis

Where there is no guarantor, the low-risk exit basis will apply.

The financial and demographic assumptions underlying the low-risk exit basis are explained below:

3. The discount rate is set equal to the annualised yield on long dated government bonds at the cessation date, with a 0% margin. This was 1.7% pa on 31 March 2022.
4. The CPI assumption is based on Hymans Robertson's ESS model. The median value of CPI inflation from the ESS was 2.7% pa on 31 March 2022.
5. Life expectancy assumptions are those used to set contribution rates, with one adjustment. A higher long-term rate of mortality improvements of 1.75% pa is assumed.

Contractor exit basis

Where there is a guarantor (eg in the case of contractors where the local authority guarantees the contractor's admission in the Fund), the contractor exit basis will apply.

The financial and demographic assumptions underlying the contractor exit basis are equal to those set for calculating contribution rates. Specifically, the discount rate is set equal to the risk-free rate at the cessation date, plus a margin equal to that set to allocate assets to the employer on joining the Fund.

Appendix E - Policy on Prepayments

1 Introduction

The purpose of this policy is to set out the administering authority's approach to the prepayment of regular contributions due by participating employers.

It should be noted that this statement is not exhaustive and individual circumstances may be taken into consideration where appropriate.

1.1 Aims and objectives

The administering authority's aims and objectives related to this policy are as follows:

- To provide employers with clarity around the circumstances where prepayment of contributions will be permitted.
- To outline the key principles followed when calculating prepayment amounts.
- To outline the approach taken to assess the suitability of a prepayment as sufficient to meet the required contributions.

1.2 Background

It is common practice in the LGPS for employers to pre-pay regular contributions that were otherwise due to be paid to the Fund in future. Employer contributions include the 'Primary Rate' – which is expressed as a percentage of payroll and reflects the employer's share of the cost of future service benefits, and the 'Secondary Rate' – which can be expressed as a percentage of payroll or a monetary amount and is an additional contribution designed to ensure that the total contributions payable by the Employer meet the funding objective.

On 22 March 2022, following a request from the LGPS Scheme Advisory Board, James Goudie QC provided an Opinion on the legal status of prepayments. This Opinion found that the prepayment of employee and employer contributions was not illegal, subject to the basis for determining the prepayment amount being reasonable, proportionate and prudent. Further, the Opinion set out specific requirements around the presentation of prepayments.

1.3 Guidance and regulatory framework

The Local Government Pension Scheme Regulations 2013 (as amended) set out the way in which LGPS funds should determine employer contributions and contain relevant provisions regarding the payment of these, including the following:

- Regulation 9 – outlines the contribution rates payable by active members
- Regulation 62 - sets the requirement for an administering authority to prepare an R&A certificate.
- Regulation 67 – sets out the requirement for employers to pay contributions in line with the Rates and Adjustments (R&A) certificate and specifies that primary contributions be expressed as a percentage of pensionable pay of active members.

2 Statement of principles

This statement of principles covers the prepayment of regular employer contributions to the Fund. Each case will be treated on its own merits, but in general:

- The administering authority will permit the prepayment of employer contributions.
- Prepaying contributions expressed as a percentage of pay introduces the risk that the prepayment amount will be insufficient to meet the scheduled contribution (as a result of differences between expected and actual payroll). Prepaying contributions is therefore only permissible in the case of secure, long-term employers (e.g. local authorities).
- The prepayment of employee contributions is not permitted.
- A discount will be applied where employer contributions are prepaid, to reflect the investment return that is assumed to be generated by the Fund over the period of prepayment.
- The Fund actuary will determine the prepayment amount, which may require assumptions to be made about payroll over the period which the scheduled contribution is due.
- Where contributions expressed as a percentage of pay have been prepaid, the administering authority will carry out an annual check (and additional contributions may be required by the employer) to make sure that the actual amounts paid are sufficient to meet the contribution requirements set out in the R&A certificate.
- Prepayment agreements will be documented by way of correspondence between the administering authority and the employer.
- The R&A certificate will be updated on an annual basis to reflect any prepayment agreements in place.
- Employers are responsible for ensuring that any prepayment agreement is treated appropriately when accounting for pensions costs.
- Prepayment agreements can cover any annual period of the R&A (or a consecutive number of annual periods).

1 Policy

3.1 Eligibility and periods covered

The Fund is happy to consider requests from any employers to pre-pay certified primary and secondary contributions. However, in general, prepayments are most appropriate for large, secure employers with stable active memberships. Employer contributions over the period of the existing R&A certificate (and, where a draft R&A certificate is being prepared following the triennial valuation, the draft R&A certificate) may be pre-paid by employers.

Prepayment of contributions due after the end of the existing (or draft) R&A certificate is not permitted, i.e. it would not be possible to prepay employer contributions due in the 2026/27 year until the results of the 2025 valuation are known and a draft R&A certificate covering the 2026 to 2029 period has been prepared.

3.2 Request and timing

Prior to making any prepayment, employers are required to inform the Fund in writing of their wish to prepay employer contributions and to request details of the amount required by the Fund to meet the scheduled future contribution.

This request should be received by the Fund within 2 months of the start of the period for which the prepayment is in respect of.

The Fund will then provide the employer with a note of the prepayment amount and the date by which this should be paid. In general, the prepayment should be as close as possible to the beginning of the appropriate R&A period and by 30 April at the latest.

Failure to pay the prepayment amount by the specified date may lead to the need for an additional and immediate payment from the employer to ensure that the amount paid is sufficient to meet the certified amount set out in the R&A certificate.

1.3 Calculation

The Fund actuary will determine the prepayment amount required.

Where the prepayment is in respect of contributions expressed as a percentage of pay:

- The Fund actuary will determine the discounted value of scheduled contributions based on an estimate of payroll over the period (using the information available and assumptions set at the previous valuation) and the discount rate set for the purpose of the previous actuarial valuation (as specified in the previous actuarial valuation report).
- A sufficiency check will be required at the end of the period (see section 3.4)

Where the prepayment is in respect of contributions expressed as a monetary amount:

- The Fund actuary will determine the discounted value of scheduled contributions based on the discount rate set for the purpose of the previous actuarial valuation (as specified in the previous actuarial valuation report).
- No sufficiency check will be required

Employers may pay more than the prepayment amount determined by the Fund actuary.

No allowance for expected outsourcing of services will be made in the Fund actuary's estimation of payroll for the prepayment period.

1.4 Sufficiency check

Where required, the Fund actuary will carry out an **annual** assessment to check that sufficient contributions have been prepaid in respect of that period. Specifically, this will review the prepayment calculation based on actual payroll of active members over the period and this may lead to a top-up payment being required from the employer.

If this sufficiency check reveals that the prepayment amount was higher than that which would have been required based on actual payroll (i.e. if actual payroll over the period is less than was assumed), this will not lead to a refund of contributions to the employer.

The sufficiency check will not compare the assumed investment return (i.e. the discount rate) with actual returns generated over the period. i.e. the check considers payroll only. Any shortfall arising due to actual investment returns being lower than that assumed will form part of the regular contribution assessment at the next valuation (as per the normal course of events).

The administering authority will notify the employer of any top-up amount payable following this annual sufficiency check and the date by which any top-up payment should be made.

1.5 Documentation and auditor approval

The Fund will provide the employer with a note of the information used to determine the prepayment amount, including:

- Discount rate used in the calculations
- The estimate of payroll (where applicable)
- The effective date of the calculation (and the date by which payment should be made)
- The scheduled regular payments which the prepayment amount covers.

The prepayment agreement will be reflected in the R&A certificate as follows:

- The unadjusted employer regular contribution rate payable over the period of the certificate
- As a note to the contribution rate table, information relating to the prepayment amount and the discount applied, for each employer where a prepayment agreement exists.

The R&A certificate will be updated on an annual basis to reflect any prepayment agreements in place.

Employers should discuss the prepayment agreement with their auditor prior to making payment and agree the accounting treatment of this. The Fund will not accept any responsibility for the accounting implications of any prepayment agreement.

1.6 Costs

Employers entering into a prepayment agreement will be required to meet the cost of this, which includes (but is not limited to) the actuarial fees incurred by the administering authority. These costs would be recharged to employers by the Fund.

1.7 Risks

Employers may enter into prepayment agreements on the expectation that the Fund will be able to generate higher returns than they can over the prepayment period. Employers should be aware that future returns are not guaranteed, and it is possible that the returns generated on prepayment amounts may generate a lower return than that which can be generated by the employer. It is also possible that negative returns will lead to the value of any prepayment being less than that which was scheduled to be paid. In such circumstances, a top-up payment would not be required (as the sufficiency check only considers the effect of actual payroll being different to that assumed in the prepayment calculation), however the employer's asset share would be lower than it would have been if contributions were paid as scheduled. This would be considered by the Fund actuary at the next triennial valuation (as per the normal course of events).

2 Related Policies

The Fund's approach to setting regular employer contribution rates is set out in the Funding Strategy Statement, specifically "Section 2 – How does the Fund calculate employer contributions?".

Appendix F - Policy on contribution reviews

1 Introduction

The purpose of this policy is to set out the administering authority's approach to reviewing contribution rates between triennial valuations.

It should be noted that this statement is not exhaustive and individual circumstances may be taken into consideration where appropriate.

1.1 Aims and objectives

The administering authority's aims and objectives related to this policy are as follows:

- To provide employers with clarity around the circumstances where contribution rates may be reviewed between valuations.
- To outline specific circumstances where contribution rates will not be reviewed.

1.2 Background

The Fund may amend contribution rates between valuations for 'significant change' to the liabilities or covenant of an employer.

Such reviews may be instigated by the Fund or at the request of a participating employer.

Any review may lead to a change in the required contributions from the employer.

1.3 Guidance and regulatory framework

Regulation 64 of the Local Government Pension Scheme Regulations 2013 (as amended) sets out the way in which LGPS funds should determine employer contributions, including the following;

- Regulation 64 (4) – allows the administering authority to review the contribution rate if it becomes likely that an employer will cease participation in the Fund, with a view to ensuring that the employer is fully funded at the expected exit date.
- Regulation 64A - sets out specific circumstances where the administering authority may revise contributions between valuations (including where a review is requested by one or more employers).

This policy also reflects statutory guidance from the Department for Levelling Up, Housing and Communities on preparing and maintaining policies relating to the review of employer contributions. Interested parties may want to refer to an accompanying guide that has been produced by the Scheme Advisory Board.

2 Statement of principles

This statement of principles covers review of contributions between valuations. Each case will be treated on its own merits, but in general:

- The administering authority reserves the right to review contributions in line with the provisions set out in the LGPS Regulations.
- The decision to make a change to contribution rates rests with the administering authority, subject to consultation with employers during the review period.
- Full justification for any change in contribution rates will be provided to employers.
- Advice will be taken from the Fund actuary in respect of any review of contribution rates.
- Any revision to contribution rates will be reflected in the Rates & Adjustment certificate.
- An additional level of security or guarantee may be sought by the Fund, in certain circumstances.

3 Policy

3.1 Circumstances for review

The Fund would consider the following circumstances as a potential trigger for review:

- in the opinion of an administering authority there are circumstances which make it likely that an employer (including an admission body) will become an exiting employer sooner than anticipated at the last valuation;
- an employer is approaching exit from the Fund within the next two years and before completion of the next triennial valuation;
- there are changes to the benefit structure set out in the LGPS Regulations which have not been allowed for at the last valuation;
- it appears likely to the administering authority that the amount of the liabilities arising or likely to arise for an employer or employers has changed significantly since the last valuation;
- it appears likely to the administering authority that there has been a significant change in the ability of an employer or employers to meet their obligations (e.g. a material change in employer covenant, or provision of additional security);
- it appears to the administering authority that the membership of the employer has changed materially such as bulk transfers, significant reductions to payroll or large-scale restructuring; or
- where an employer has failed to pay contributions or has not arranged appropriate security as required by the administering authority.

3.2 Employer requests

The administering authority will also consider a request from any employer to review contributions where the employer has undertaken to meet the costs of that review and sets out the reasoning for the review (which would be expected to fall into one of the above categories, such as a belief that their covenant has changed materially, or they are going through a significant restructuring impacting their membership).

The administering authority will require additional information to support a contribution review made at the employer's request. The specific requirements will be confirmed following any request and this is likely to include the following:

- a copy of the latest accounts;
- details of any additional security being offered (which may include insurance certificates);
- budget forecasts; and/or
- information relating to sources of funding.

The administering authority will endeavour to complete any review within 3 months of request subject to receipt of satisfactory evidence, and will monitor any change in an employer's circumstances on a regular basis following any change in contribution rate and may require further information from the employer to support this monitoring process.

The costs incurred by the administering authority in carrying out a contribution review (at the employer's request) will be met by the employer. These will be confirmed upfront to the employer prior to the review taking place.

3.3 Impact on other employers

When undertaking any review of contributions, the administering authority will also consider the impact of a change to contribution rates on other Fund employers. This will include the following factors:

- The existence of a guarantor.
- The amount of any other security held.
- The size of the employer's liabilities relative to the whole Fund.

The administering authority will consult with other Fund employers as necessary.

3.4 Effect of market volatility

Except in circumstances such as an employer nearing cessation, the administering authority will not consider market volatility or changes to asset values as a basis for a change in contributions outside a formal valuation.

3.5 Documentation

Where revisions to contribution rates are necessary, the Fund will provide the employer with a note of the information used to determine these, including:

- Explanation of the key factors leading to the need for a review of the contribution rates, including, if appropriate, the updated funding position.
- A note of the new contribution rates and effective date of these.
- Date of next review.
- Details of any processes in place to monitor any change in the employer's circumstances (if appropriate), including information required by the administering authority to carry out this monitoring.

The Rates & Adjustments certificate will be updated to reflect the revised contribution rates.

4 Related Policies

The Fund’s approach to setting employer contribution rates is set out in the Funding Strategy Statement, specifically “Section 2 – How does the Fund calculate employer contributions?”.

Appendix G - Policy on pass-through

1 Introduction

The purpose of this policy is to set out the administering authority's approach to admitting new contractors into the Fund on a pass-through basis. In addition, and subject to review on a case-by-case basis, the Fund may be willing to apply its pass-through principles to other admission bodies where liabilities are covered by a guarantor within the fund.

It should be noted that this statement is not exhaustive and individual circumstances may be taken into consideration where appropriate.

1.1 Aims and objectives

The administering authority's aims and objectives related to this policy are as follows:

- To set out the Fund's approach to admitting new contractors / admission bodies, including the calculation of contribution rates and how risks are shared under the pass-through arrangement.

- To outline the process for admitting new contractors / admission bodies into the Fund.

1.2 Background

Employees outsourced from local authorities, police and fire authorities must be offered pension benefits that are the same, better than, or count as being broadly comparable to, the Local Government Pension Scheme (as per the Best Value Authorities Staff Transfer (Pensions) Direction 2007) and the Welsh Authority Staff Transfers (Pensions) Direction 2012. This is typically achieved by employees remaining in the LGPS and the new employer becoming an admitted body to the Fund and making the requisite employer contributions.

Pass-through is an arrangement whereby the letting authority (e.g. the local authority) retains the main risks of fluctuations in the employer contribution rate during the life of the contract, and the risk that the employer's assets may be insufficient to meet the employees' pension benefits at the end of the contract.

1.3 Guidance and regulatory framework

The Local Government Pension Scheme Regulations 2013 (as amended) set out the way in which LGPS funds should determine employer contributions and contain relevant provisions regarding the payment of these, including the following:

- Schedule 2 Part 3 sets out the entities eligible to join the Fund as an admitted body, their key responsibilities as an admitted body and the requirements of the admission agreement.

- Regulation 64 - covers the requirements for a cessation valuation following the exit of a participating employer from the fund.

- Regulation 67 – sets out the requirement for employers to pay contributions in line with the Rates and Adjustments (R&A) certificate and provides a definition of the primary rate.

2 Statement of principles

This statement of principles covers the admission of new contractors (or other admission bodies) to the Fund on a pass-through basis. Each case will be treated on its own merits, but in general:

- Employers which "outsource" have flexibility in the way that they can deal with the pension risk potentially taken on by the contractor. There are typically three different routes that such employers may wish to adopt. Clearly as the risk ultimately resides with the employer letting the contract, it is for them to agree the appropriate route with the contractor:

- Pooling
    - Under this option the contractor is pooled with the letting authority. In this case, the contractor pays the same rate as the letting authority, which may be under a stabilisation approach.
- Letting authority retains pre-contract risks
    - Under this option the letting authority would retain responsibility for assets and liabilities in respect of service accrued prior to the contract commencement date. The contractor would be responsible for the future liabilities that accrue in respect of transferred staff.
    - The contractor's contribution rate could vary from one valuation to the next. It would be liable for any deficit (or entitled to any surplus) at the end of the contract term in respect of assets and liabilities attributable to service accrued during the contract term. Please note, the level of exit credit (if any) payable on cessation would be determined by the Administering Authority in accordance with the Regulations and this FSS.
- Fixed contribution rate agreed
    - Under this option the contractor pays a fixed contribution rate throughout its participation in the Fund and does not pay any deficit or receive an exit credit.

- The administering authority is willing to administer any of the above options as long as the approach is documented in the admission agreement as well as the transfer agreement.
- The Fund has no strong preference for any of the approaches discussed above.
- Unless otherwise instructed by the letting authority, under the fixed contribution rate approach, the contractor's pension contribution rate is set equal to the primary contribution rate payable by the letting authority.
- The letting authority retains responsibility for variations in funding level, for instance due to investment performance, changes in market conditions, and longevity under its pass-through arrangement, irrespective of the size of the outsourcing.
- The contractor will meet the cost of additional liabilities arising from (non-ill health) early retirements and augmentations together with funding strains arising from excessive salary growth.
- Ill health experience will be pooled with the letting authority and no additional strain payments will be levied on the contractor in respect of ill health retirements.
- The contractor will not be required to obtain an indemnity bond.
- There will be no notional transfer of assets to the contractor within the Fund. This means that all assets and liabilities relating to the contractor's staff will remain the responsibility of the letting authority during the period of participation.
- At the end of the contract (or when there are no longer any active members participating in the Fund, for whatever reason), the admission agreement will cease and no further payment will be required from the contractor (or the letting authority) to the Fund, save for any outstanding regular contributions and/or invoices. Likewise, no "exit credit" payment will be required from the Fund to the contractor (or letting authority).

- The terms of the pass-through agreement will be documented by way of the admission agreement between the administering authority, the letting authority, and the contractor.
- All existing admission agreements are unaffected by this policy.

The principles outlined above are the default principles which will apply; however, the letting authority may request the specific details of a particular agreement to differ from the principles outlined above.

The administering authority is not obliged to agree to a departure from the principles set out in this policy but will consider such requests and engage with the letting authority to reach agreement.

3 Policy and process

3.1 Compliance

Adherence to this policy is the responsibility of the relevant responsible service manager for any given outsourcing.

The administering authority and the Fund actuary must always be notified that an outsourcing has taken place, regardless of the number of members involved.

3.2 Contribution rates

Where a contract is let on the basis of pass-through, as described above, the contribution rate payable by the contractor over the period of participation will be determined at the start of the contract in accordance with the agreed methodology (as discussed above) and this approach will apply throughout its participation in the Fund.

3.3 Risk sharing and cessation valuation

The letting authority will retain the risk of the contractor becoming insolvent during the period of admission and so no indemnity bond will be required from contractors participating in the Fund on a pass-through basis. The letting authority is effectively guaranteeing the contractor's participation in the Fund.

A cessation valuation is required when a contractor no longer has any active members in the fund. This could be due to a contract coming to its natural end, insolvency of a contractor or the last active member leaving employment or opting out of the LGPS.

Where a pass-through arrangement is in place, the Fund assets and liabilities associated with outsourced employees are retained by the letting authority. At the end of the admission, the cessation valuation will therefore record nil assets and liabilities for the ceasing employer and therefore that no cessation debt or exit credit is payable to or from the Fund.

The contractor will be required to pay any outstanding regular contributions and/or unpaid invoices relating to the cost of (non-ill health) early retirement strains and/or augmentations and/or in respect of excessive salary increases at the end of the contract.

Under a typical pass-through arrangement, the contractor will be liable for additional pension costs that arise due to items over which it exerts control. The risk allocation is as follows:

Risks	**Letting authority**	**Contractor/ Admitted body**
Surplus/deficit prior to the transfer date	✓	
Interest on surplus/deficit	✓	
Investment performance of assets held by the Fund	✓	
Changes to the discount rate that affect past service liabilities	✓	

Changes to the discount rate that affect future service accrual	✓	
Change in longevity assumptions that affect past service liabilities	✓	
Changes to longevity that affect future accrual	✓	
Price inflation affects past service liabilities	✓	
Price inflation / pension increases that affect future accrual	✓	
Exchange of pension for tax free cash	✓	
Ill health retirement experience	✓	
Strain costs attributable to granting early retirements (not due to ill health (e.g. redundancy, efficiency, waiving actuarial reductions on voluntary early retirements)		✓
Greater/lesser level of withdrawals	✓	
Rise in average age of contractor's employee membership	✓	
Changes to LGPS benefit package	✓	
Excess liabilities attributable to the contractor granting pay rises that exceed those assumed in the last formal actuarial valuation of the Fund		✓
Award of additional pension or augmentation		✓

3.4 Accounting valuations

Accounting for pensions costs is a responsibility for individual employers.

It is the administering authority's understanding that contractors may be able to account for such pass-through admissions on a defined contribution basis and therefore no formal FRS102 / IAS19 report may be required (e.g. contractors paying a fixed rate are largely indemnified from the risks inherent in providing defined benefit pensions).

As the letting authority retains most of the pension risk relating to contractors, it is the administering authority's understanding that these liabilities (and assets) should be included in the letting authority's FRS102 / IAS19 disclosures.

The administering authority expects employers to seek approval to the treatment of pension costs from their auditor.

3.5 Application

Letting authorities may request terms which differ from those set out in this policy and any such request will be considered by the administering authority.

All existing admission agreements (i.e. which commenced prior to the effective date of this policy) are unaffected by this policy.

3.6 Process

The procurement department at each letting authority that has responsibility for staff/service outsourcing must be advised of this policy. The process detailed below must be adhered to by the letting authority and (where applicable) the contractor.

- **Tender Notification** - The letting authority must publicise this pass-through policy as part of its tender process to bidders. This should confirm that the winning bidder will not be responsible for ensuring that the liabilities of outsourced employees are fully funded at the end of the contract, and that the winning bidder will only be responsible for paying contributions to the Fund during the period of participation and meeting the cost of (non-ill health) early retirement strains, the cost of benefit augmentations and excessive salary growth (assuming the terms of this policy are adhered to). It should also advise the employer contribution rate as detailed in paragraph 3.2.

- **Initial notification to Pension Team** – The letting authority must contact the administering authority when a tender (or re-tender) of an outsourcing contract is taking place and staff (or former staff) are impacted. The administering authority must be advised prior to the start of the tender and the letting uthority must also confirm that the terms of this policy have been adhered to.
- **Confirmation of winning bidder** – The letting authority must immediately advise the administering authority of the winning bidder.
- **Request for winning bidder to become an admitted body** – The winning bidder (in combination with the letting authority), should request to the administering authority that it wishes to become an admitted body within the Fund.
- **Template admission agreement** – a template pass-through admission agreement will be used for admissions under this policy. It will set out all agreed points relating to employer contribution rate, employer funding responsibilities, and exit conditions. Only in exceptional circumstances, and only with the prior agreement of the administering authority, will the wording within the template agreement be changed. All admission agreements must be reviewed (including any changes) by the administering authority and possibly its legal advisors.
- **Signed admission agreement** - Signing of the admission agreement can then take place between an appropriate representative of the winning bidder, the lead finance officer of the letting authority, and the administering authority. It is at this point the Fund can start to receive contributions from the contractor and its employee members (backdated if necessary).
- **Admitted body status** – The letting authority will advise the contractor of its requirements and responsibilities within the Fund.

3.7 Costs

Contractors being admitted to the Fund under a pass-through agreement will be required to meet the cost of this, which includes (but is not limited to) the actuarial fees incurred by the administering authority.

4 Related Policies

The Fund's approach to setting regular employer contribution rates is set out in its Funding Strategy Statement, specifically "Section 2 – How does the Fund calculate employer contributions?".

The treatment of new employers joining the Fund is set out in the Funding Strategy Statement, specifically "Section 5 – What happens when an employer joins the Fund?"

The treatment of employers exiting the Fund is set out in the Funding Strategy Statement, specifically "Section 6 – What happens when an employer leaves the Fund?"

Appendix H - Policy on ill health risk management

1 Introduction

The purpose of this policy is to set out the administering authority's approach to managing the risk arising due to ill health retirements.

It should be noted that this statement is not exhaustive and individual circumstances may be taken into consideration where appropriate.

1.1 Aims and objectives

The administering authority's aims and objectives related to this policy are as follows:

- To explain the approach taken to manage ill health risk
- To specify circumstances where a review of experience may lead to additional contributions.
- To outline the key risks and benefits to this arrangement.

1.2 Background

Additional liabilities can arise following the retirement of members due to ill health. These additional liabilities can include the unreduced early payment of pension benefits and the award of additional pension. The level of pension benefits paid on ill health depends on the severity of the member's condition.

The LGPS Regulations require the additional liabilities to be funded by way of payments from employers. Payment of large lump sums to meet strains as and when they arise can lead to unexpected payments and put significant strain on employers' budgets. LGPS funds are able to put arrangements in place which mitigate the risk of having to pay a large cash sum due to an ill health retirement strain payment.

To mitigate this risk to smaller employers, and to evidence good governance and risk management, the administering authority has arranged for an external insurance policy to cover ill health early retirement strains for smaller employers in the Fund. Each of these employer's contributions to the Fund includes its share of that year's insurance premium. When an active member retires on ill health early retirement, the claim amount received from the insurer will be credited to the respective employer's asset share in the Fund.

For all other employers that are not covered by the external insurance policy, any funding strain in excess of the allowance made in the funding basis would be met through an increase to ongoing contributions.

1.3 Guidance and regulatory framework

The Local Government Pension Scheme Regulations 2013 (as amended) set out the benefits payable to members and the way in which additional benefits (such as those arising on ill health early retirement) should be funded. These include the following:

- Regulation 35 – permits the early retirement of pension on ill health grounds.
- Regulation 39 – sets out the calculation of the pension payable in the instance of ill health retirement.
- Regulation 68 – sets out the additional contributions payable by the employer to meet the liability strain caused by a member retiring through ill health.

2 Statement of principles

This statement of principles covers the external insurance arrangement in place to manage the risks created by ill health retirements for smaller employers, and the equivalent risks for larger employers not using the ill health insurance arrangement. In general:

- Employers will not be required to pay lump sum amounts to meet ill health retirement strains (in the normal course of events).
- Both Tier 1 and Tier 2 ill health retirement strains will be covered by this arrangement.
- For smaller employers in the Fund that are covered by external insurance:
    - Eligible employers are unable to opt out of this arrangement.
    - Each of these employer's contributions to the Fund includes its share of that year's insurance premium.
- For all other employers in the Fund:
    - Regular contribution rates will include the expected cost of assumed ill health retirements.
    - The Hymans Robertson Employer Asset Tracker (HEAT) system is used to track actual ill health experience.
    - Any funding strain in excess of the allowance made in the funding basis would ordinarily be met through an increase to ongoing contributions at the next triennial valuation. However, the Fund reserves the right to request immediate additional contributions in the event of material ill health strains during the period between valuations.

3 Policy

3.1 Purpose

The purpose of this ill health risk management policy is to protect the Fund against adverse ill health retirement experience of individual employers.

3.2 Eligibility

This policy applies to all employers in the Fund. The 'smaller employers' that are covered by external insurance include all town councils and community admission bodies (with under 75 active members) and exclude scheduled or designated bodies.

3.3 Operation

The policy works as follows:

- Assets shares for each employer are determined each month by Hymans Robertson, using the HEAT system and based on the monthly cashflows and asset information provided by the fund.

  As part of this data provision, the fund determines the strain costs arising due to ill health retirements and this strain is allocated to each active employer in proportion to their asset share at the beginning of that month.

- Contribution rates are set by the Fund Actuary every three years as part of the triennial valuation.

  Primary contribution rates include allowance for the expected cost of assumed ill health retirements (expressed as a percentage of payroll).

This provides ongoing funding for the assumed level of ill health retirement strains.

3.3.1 Smaller employers

- Smaller employers in the Fund are covered by the ill health insurance arrangement.
    - When an active member retires on tier one or tier two ill health early retirement, a claim amount equal to the fund calculated strain cost for the retirement will be received from the insurer (assuming a valid claim) and credited to the respective employer's asset share in the Fund.
    - It is not guaranteed that the insurer will pay the claim, for example if it does not believe that the requirements for a tier one or tier two ill health retirement have been met.

3.3.2 Other employers

- Other employers in the Fund not covered by the ill health insurance arrangement.
    - Where the actual level of ill health retirement strains exceeds the assumed level, this will lead to a shortfall arising at the next triennial valuation for those employers not covered by the ill health insurance arrangement.

      No immediate additional contributions will be required from employers to meet this shortfall, but this could increase the contribution requirement following the next triennial valuation.
    - Similarly, where the actual level of ill health retirement strains is lower than the assumed level, this will lead to a surplus arising at the next triennial valuation.

      No refund will be paid to employers as a result of this, but this surplus could lead to downwards pressures on contributions following the next triennial valuation.

3.4 Review and additional contributions
The administering authority will review the level of ill health experience across all employers at each triennial valuation.

If an employer has an unusually high incidence of ill health retirement over the previous inter-valuation period, the administering authority will engage with the employer to understand the reasons for this. In the event of concerns around the eligibility criteria applied by the employer in granting ill health retirements, this could lead to the need for the employer to pay additional contributions to the Fund.

3.5 Costs
The costs of operating this policy will be met by the Fund as part of its administration expenses.

4 Related Policies

The Fund's approach to setting regular employer contribution rates is set out in the Funding Strategy Statement, specifically "Section 2 – How does the Fund calculate employer contributions?".

Appendix I - Policy on cessations

1 Introduction

The purpose of this policy is to set out the administering authority's approach to dealing with circumstances where a scheme employer leaves the Fund and becomes an exiting employer (a cessation event).

It should be noted that this policy is not exhaustive. Each cessation will be treated on a case-by-case basis, however certain principles will apply as governed by the regulatory framework (see below) and the Fund's discretionary policies (as described in Section 3 – Policies below).

1.1 Aims and Objectives

The administering authority's aims and objectives related to this policy are as follows:

- To confirm the approach for the treatment and valuation of liabilities for employers leaving the Fund.
- To provide information about how the Fund may apply its discretionary powers when managing employer cessations.
- To outline the responsibilities of (and flexibilities for) exiting employers, the administering authority, the actuary and, where relevant, the original ceding scheme employer (usually a letting authority).

1.2 Background

As described in Section 7 of the Funding Strategy Statement (FSS), a scheme employer may become an exiting employer when a cessation event is triggered e.g. when the last active member stops participating in the Fund. On cessation from the Fund, the administering authority will instruct the Fund actuary to carry out a valuation of assets and liabilities for the exiting employer to determine whether a deficit or surplus exists. The Fund has full discretion over the repayment terms of any deficit, and the extent to which any surplus results in the payment of an exit credit.

1.3 Guidance and regulatory framework

The Local Government Pension Scheme Regulations 2013 (as amended) contain relevant provisions regarding employers leaving the Fund (Regulation 64) and include the following:

- Regulation 64 (1) – this regulation states that, where an employing authority ceases to be a scheme employer, the administering authority is required to obtain an actuarial valuation of the liabilities of current and former employees as at the termination date. Further, it requires the Rates & Adjustments Certificate to be amended to show the revised contributions due from the exiting employer
- Regulation 64 (2) – where an employing authority ceases to be a scheme employer, the administering authority is required to obtain an actuarial valuation of the liabilities of current and former employees as at the exit date. Further, it requires the Rates & Adjustments Certificate to be amended to show the exit payment due from the exiting employer or the excess of assets over the liabilities in the fund.
- Regulation 64 (2ZAB) – the administering authority must determine the amount of an exit credit, which may be zero, taking into account the factors specified in paragraph (2ZC) and must:
    a) Notify its intention to make a determination to-
        (i) The exiting employer and any other body that has provided a guarantee to the Exiting Employer
        (ii) The scheme employer, where the exiting employer is a body that participated in the Scheme as a result of an admission agreement

b) Pay the amount determined to that exiting employer within six months of the exit date, or such longer time as the administering authority and the exiting employer agree.

- Regulation (2ZC) – In exercising its discretion to determine the amount of any exit credit, the administering authority must have regard to the following factors-
  a) The extent to which there is an excess of assets in the fund relating to that employer in paragraph (2)(a)
  b) The proportion of this excess of assets which has arisen because of the value of the employer's contributions
  c) Any representations to the administering authority made by the exiting employer and, where that employer participates in the scheme by virtue of an admission agreement, any body listed in paragraphs (8)(a) to (d)(iii) of Part 3 to Schedule 2 of the Regulations: and
  d) Any other relevant factors

- Regulation 64 (2A) & (2B)– the administering authority, at its discretion, may issue a suspension notice to suspend payment of an exit amount for up to three years, where it reasonably believes the exiting employer is to have one or more active members contributing to the fund within the period specified in the suspension notice.

- Regulation 64 (3) – in instances where it is not possible to obtain additional contributions from the employer leaving the Fund or from the bond/indemnity or guarantor, the contribution rate(s) for the appropriate scheme employer or remaining fund employers may be amended.

- Regulation 64 (4) – where it is believed a scheme employer may cease at some point in the future, the administering authority may obtain a certificate from the Fund actuary revising the contributions for that employer, with a view to ensuring that the assets are expected to be broadly equivalent to the exit payment that will be due.

- Regulation 64 (5) – following the payment of an exit payment to the Fund, no further payments are due to the Fund from the exiting employer.

- Regulation 64 (7A-7G) – the administering authority may enter into a written deferred debt agreement, allowing the employer to have deferred employer status and to delay crystallisation of debt despite having no active members.

- Regulation 64B (1) – the administering authority may set out a policy on spreading exit payments.

In addition to the 2013 Regulations summarised above, Regulation 25A of the Local Government Pension Scheme (Transitional Provisions, Savings and Amendment) Regulations 2014 ("the Transitional Regulations") give the Fund the ability to levy a cessation debt on employers who have ceased participation in the Fund (under the previous regulations) but for whom a cessation valuation was not carried out at the time. This policy document describes how the Fund expects to deal with any such cases.

This policy also reflects statutory guidance from the Department for Levelling Up, Housing and Communities on preparing and maintaining policies relating to employer exits. Interested parties may want to refer to an accompanying guide that has been produced by the Scheme Advisory Board.

These regulations relate to all employers in the Fund.

2 Statement of Principles

This Statement of Principles covers the Fund's approach to exiting employers. Each case will be treated on its own merits but in general:

- it is the Fund's policy that the determination of any surplus or deficit on exit should aim to minimise, as far as is practicable, the risk that the remaining, unconnected employers in the Fund have to make contributions in future towards meeting the past service liabilities of current and former employees of employers leaving the Fund.

- the Fund's preferred approach is to request the full payment of any exit debt (an exit payment), which is calculated by the actuary on the appropriate basis (as per Section 7 of the FSS and Section 3.1 below). This would extinguish any liability to the Fund by the exiting employer.

- the Fund's key objective is to protect the interests of the Fund, which is aligned to protecting the interests of the remaining employers. A secondary objective is to consider the circumstances of the exiting employer in determining arrangements for the recovery of the exit debt.

3 Policies

On cessation, the administering authority will instruct the Fund actuary to carry out a cessation valuation to determine whether there is any deficit or surplus as defined in Section 4.3 of the FSS.

Where there is a deficit, payment of this amount in full would normally be sought from the exiting employer. The Fund's normal policy is that this cessation debt is paid in full in a single lump sum within 28 days of the employer being notified.

However, the Fund will consider written requests from employers to spread the payment over an agreed period, in the exceptional circumstance where payment of the debt in a single immediate lump sum could be shown by the employer to be materially detrimental to the employer's financial situation (see 3.2 Repayment flexibility on exit payments below).

In circumstances where there is a surplus, the administering authority will determine, at its sole discretion, the amount of exit credit (if any) to be paid to the exiting employer (see 3.3 Exit credits below).

3.1 Approach to cessation calculations

Cessation valuations are carried out on a case-by-case basis at the sole discretion of the Fund depending on the exiting employer's circumstances. However, in general the following broad principles and assumptions may apply, as described in Section 7.2 of the FSS and summarised below:

Type of employer	Cessation exit basis	Responsible parties for unpaid or future deficit emerging
Local Authorities, Police, Parc Cenedlaethol Eryri	Low risk basis[1]	Shared between other Fund employers
Other Scheduled Bodies	Low risk basis[1]	Shared between other Fund employers
Admission bodies (TABs)	Ongoing basis / contractor exit basis[2]	Letting authority (where applicable), otherwise shared between other Fund employers
Admission bodies (CABs)	Low risk basis	Shared between other Fund employers (if no guarantor exists)
Designating employers	Low risk basis	Shared between other Fund employers (if no guarantor exists)

[1]Cessation is assumed not to be generally possible, as Scheduled Bodies are legally obliged to participate in the LGPS. In the rare event of cessation occurring (e.g. machinery of Government changes), these cessation principles would apply.

[2]Where a TAB has taken, in the view of the administering authority, action that has been deliberately designed to bring about a cessation event (e.g. stopping future accrual of LGPS benefits), then the cessation valuation will be carried out on a low-risk basis.

3.2 Repayment flexibility on exit payments

Deferred spreading arrangement (DSA)

The Fund will consider written requests from exiting employers to spread an exit payment over an agreed period, in the exceptional circumstance where payment of the debt in a single immediate lump sum could be shown by the employer to be materially detrimental to the employer's financial situation.

In this exceptional case, the Fund's policy is:

- The agreed spread period is no more than three years, but the Fund could use its discretion to extend this period in extreme circumstances.
- The Fund may consider factors such as the size of the exit payment and the financial covenant of the exiting employer in determining an appropriate spreading period.
- The exiting employer may be asked to provide the administering authority with relevant financial information such as a copy of its latest accounts, sources of funding, budget forecasts, credit rating (if any) etc. to help in this determination.
- Payments due under the DSA may be subject to an interest charge.
- The Fund will only consider written requests within six months of the employer exiting the Fund. The exiting employer would be required to provide the Fund with detailed financial information to support its request.
- The Fund would take into account the amount of any security offered and seek actuarial, covenant and legal advice in all cases.
- The Fund proposes a legal document, setting out the terms of the exit payment agreement, would be prepared by the Fund and signed by all relevant parties prior to the payment agreement commencing.
- The terms of the legal document should include reference to the spreading period, the annual payments due, interest rates applicable, other costs payable and the responsibilities of the exiting employer during the exit spreading period.
- Any breach of the agreed payment plan would require payment of the outstanding cessation amount immediately.
- Where appropriate, cases may be referred to the Pensions Committee for consideration and considered on its individual merit. Decisions may be made by the Chair in consultation with officers if an urgent decision is required between Committee meetings.

Deferred debt agreement (DDA)

As an alternative, where the ceasing employer is continuing in business, the Administering Authority may enter into a written agreement with the employer to defer its obligations to make an exit payment and continue to make secondary contributions (a 'Deferred Debt Agreement' as described in Regulation 64 (7A)).

The adoption of this approach will continue to expose the employer to stock market and other funding risks during the deferment period, leading to changes in the size of the debt, rather than crystallising the size of the debt at the point of cessation.

The employer must meet all requirements on Scheme employers and pay the secondary rate of contributions as determined by the Fund actuary until the termination of the DDA.

The Administering Authority may consider a DDA in the following circumstances:

- The employer requests the Fund consider a DDA.
- The employer is expected to have a deficit if a cessation valuation was carried out.
- The employer is expected to be a going concern.
- The covenant of the employer is considered sufficient by the administering authority.

The Administering Authority will normally require:

- A legal document to be prepared, setting out the terms of the DDA and signed by all relevant parties prior to the arrangement commencing.(including details of the time period of the DDA, the annual payments due, the frequency of review and the responsibilities of the employer during the period).
- Relevant financial information for the employer such as a copy of its latest accounts, sources of funding, budget forecasts, credit rating (if any) to support its covenant assessment.
- Security be put in place covering the employer's deficit on their cessation basis and the Fund will seek actuarial, covenant and legal advice in all cases.
- Regular monitoring of the contribution requirements and security requirements
- All costs of the arrangement are met by the employer, such as the cost of advice to the Fund, ongoing monitoring or the arrangement and correspondence on any ongoing contribution and security requirements.

A DDA will normally terminate on the first date on which one of the following events occurs:

- The employer enrols new active fund members.
- The period specified, or as varied, under the DDA elapses.
- The take-over, amalgamation, insolvency, winding up or liquidation of the employer.
- The administering authority serves a notice on the employer that the administering authority is reasonably satisfied that the employer's ability to meet the contributions payable under the DDA has weakened materially or is likely to weaken materially in the next 12 months.
- The Fund actuary assesses that the employer has paid sufficient secondary contributions to cover all (or almost all) of the exit payment due if the employer becomes an exiting employer on the calculation date (i.e. employer is now largely fully funded on its low risk basis).
- The Fund actuary assesses that the employer's value of liabilities has fallen below an agreed *de minimis* level and the employer becomes an exiting employer on the calculation date.
- The employer requests early termination of the agreement and settles the exit payment in full as calculated by the Fund actuary on the calculation date (i.e. the employer pays its outstanding cessation debt on its cessation basis).

On the termination of a DDA, the employer will become an exiting employer and a cessation valuation will be completed in line with this policy.

3.3 Exit credits

The administering authority's entitlement to determine whether exit credits are payable in accordance with these provisions shall apply to all employers ceasing their participation in the fund after 14 May 2018. This provision therefore is retrospectively effective to the same extent as provisions of the Local Government Pension Scheme (Amendment) Regulations 2020.

The administering authority may determine the amount of exit credit payable to be zero, however, in making a determination, the Administering Authority will take into account the following factors.

a) the extent to which there is an excess of assets in the Fund relating to the employer over and above the liabilities specified.

b) the proportion of the excess of assets which has arisen because of the value of the employer's contributions.

c) any representations to the administering authority made by the exiting employer, guarantor, ceding Scheme Employer (usually the Letting Authority) or by a body which owns, funds or controls the exiting employer; or in some cases, the Secretary of State.

d) any other relevant factors

Admitted bodies

i. No exit credit will normally be payable in respect of admissions who joined the Fund before 14 May 2018 unless it is subject to a risk sharing arrangement as per paragraph iii) below. Prior to this date, the payment of an exit credit was not permitted under the Regulations and this will have been reflected in the commercial terms agreed between the admission body and the letting authority/awarding authority/ceding employer. This will also apply to any pre-14 May 2018 admission which has been extended or 'rolled over' beyond the initial expiry date and on the same terms that applied on joining the fund.

ii. No exit credit will normally be payable to any admission body who participates in the fund via a pass-through approach. For the avoidance of doubt, whether an exit credit is payable to any admission body who participates in the Fund via the "Letting employer retains pre-contract risks" route is subject to its risk sharing arrangement, as per paragraph iii) below.

iii. The Fund will make an exit credit payment in line with any contractual or risk sharing agreements which specifically covers the ownership of exit credits/cessation surpluses or if the admission body and letting authority have agreed any alternative approach (which is consistent with the Regulations and any other legal obligations). This information, which will include which party is responsible for which funding risk, must be presented to the Fund in a clear and unambiguous document with the agreement of both the admission body and the letting authority/awarding authority/ceding employer and within one month (or such longer time as may be agreed with the administering authority) of the admission body ceasing participation in the Fund. The Fund will also consider any representations made by the letting authority/awarding authority/ceding employer regarding monies owed to them by the admission body in respect of the contract that is ceasing or any other contractual arrangement between the two parties. The letting authority/awarding authority/ceding employer must make such representations in a clear and unambiguous document within one month of the admission body ceasing participation in the Fund.

iv. In the absence of this information or if there is any dispute from either party with regards interpretation of contractual or risk sharing agreements as outlined in iii) above, the Fund will withhold payment of the exit credit until such disputes are resolved and the information is provided to the administering authority.

v. Where a guarantor arrangement is in place, but no formal risk-sharing arrangement exists, the Fund will consider how the approach to setting contribution rates payable by the admission body during its participation in the Fund reflects which party is responsible for funding risks. This decision will inform the determination of the value of any exit credit payment.

vi. If the admission agreement ends early, the Fund will consider the reason for the early termination, and whether that should have any relevance on the Fund's determination of the value of any exit credit payment. In these cases, the Fund will consider the differential between employers' contributions paid (including investment returns earned on these monies) and the size of any cessation surplus.

vii. If an admitted body leaves on a low risk basis (because no guarantor is in place), then any exit credit will normally be paid in full to the employer.

viii. The decision of the Fund is final in interpreting how any arrangement described under iii), v), vi) and vii) applies to the value of an exit credit payment.

Scheduled bodies and designating bodies

i. Where a guarantor arrangement is in place, but no formal risk-sharing arrangement exists, the Fund will consider how the approach to setting contribution rates payable by the employer during its participation in the Fund reflects which party is responsible for funding risks. This decision will inform the determination of the value of any exit credit payment.

ii. Where no formal guarantor or risk-sharing arrangement exists, the Fund will consider how the approach to setting contribution rates payable by the employer during its participation in the Fund reflects the extent to which it is responsible for funding risks. This decision will inform the determination of the value of any exit credit payment.

iii. The decision of the Fund is final in interpreting how any arrangement described under i) and ii) applies to the value of an exit credit payment.

iv. If a scheduled body or designating body becomes an exiting employer due to a reorganisation, merger or take-over, then no exit credit will be paid.

v. If a scheduled body or designating body leaves on a low-risk basis (because no guarantor is in place), then any exit credit will normally be paid in full to the employer.

General

i. The Fund will advise the exiting employer as well as the letting authority and/or other relevant scheme employers of its decision to make an exit credit determination under Regulation 64.

ii. Subject to any risk sharing or other arrangements and factors discussed above, when determining the cessation funding position the Fund will generally make an assessment based on the value of contributions paid by the employer during their participation, the assets allocated when they joined the Fund and the respective investment returns earned on both.

iii. The Fund will also factor in if any contributions due or monies owed to the Fund remain unpaid by the employer at the cessation date. If this is the case, the Fund's default position will be to deduct these from any exit credit payment.

iv. The final decision will be made by the Head of Finance, in conjunction with advice from the Fund's actuary and/or legal advisors where necessary, in consideration of the points held within this policy.

v. The Fund accepts that there may be some situations that are bespoke in nature and do not fall into any of the categories above. In these situations the Fund will discuss its approach to determining an exit credit with all affected parties. The decision of the Fund in these instances is final.

vi. The guidelines above at point v) in the ‘Admitted bodies’ section, and at points i) and ii) in the ‘Scheduled bodies and designating bodies’ section, make reference to the Fund ‘considering the approach to setting contribution rates during the employer’s participation’. The different funding approaches, including the parameters used and how these can vary based on employer type, are covered in detail in Table 1 (section 2.2) in the FSS. Considering the approach taken when setting contribution rates of the exiting employer may help the Fund to understand the extent to which the employer is responsible for funding the underlying liabilities on exit. For example, if contribution rates have always been based on ongoing assumptions then this may suggest that these are also appropriate assumptions for exit credit purposes (subject to the other considerations outlined within this policy). Equally, a shorter than usual funding time horizon or lower than usual probability of success parameter may reflect underlying commercial terms about how responsibility for pension risks is split between the employer and its guarantor. For the avoidance of doubt, each exiting employer will be considered in the round alongside the other factors mentioned above.

vii. None of the above should be considered as fettering the Fund’s discretionary decision, instead it is an indication of how decisions are likely to be made. However it is important to bear in mind that each and every potential exit credit case will be considered by the administering authority on its own merits, and the administering authority will make its discretionary decision on that basis.

Disputes

In the event of any dispute or disagreement on the amount of any exit credit paid and the process by which that has been considered, the appeals and adjudication provisions contained in Regulations 74-78 of the LGPS Regulations 2013 would apply.

4 Practicalities and process

4.1 Responsibilities of ceasing employers

An employer which is aware that its participation in the Fund is likely to come to an end must:

- advise the Fund, in writing, of the likely ending of its participation (either within the terms of the admission agreement in respect of an admission body (typically a 3 month notice period is required) or otherwise as required by the Regulations for all other scheme employers). It should be noted that this includes closed employers where the last employee member is leaving (whether due to retirement, death or otherwise leaving employment).
- provide any relevant information on the reason for leaving the Fund and, where appropriate, contact information in the case of a take-over, merger or insolvency.
- provide all other information and data requirements as requested by the administering authority which are relevant, including in particular any changes to the membership which could affect the liabilities (e.g. salary increases and early retirements) and an indication of what will happen to current employee members on cessation (e.g. will they transfer to another Fund employer, will they cease to accrue benefits within the Fund, etc.).

4.2 Responsibilities of administering authority

The administering authority will:

- gather information as required, including, but not limited to, the following:
    - details of the cessation - the reason the employer is leaving the Fund (i.e. end of contract, insolvency, merger, machinery of government changes, etc.) and any supporting documentation that may have an effect on the cessation.
    - complete membership data for the outgoing employer and identify changes since the previous formal valuation.
    - the likely outcome for any remaining employee members (e.g. will they be transferred to a new employer, or will they cease to accrue liabilities in the Fund).
- identify the party that will be responsible for the employer’s deficit on cessation (i.e. the employer itself, an insurance company, a receiver, another Fund employer, guarantor, etc.).
- commission the Fund actuary to carry out a cessation valuation under the appropriate regulation.
- where applicable, discuss with the employer the possibility of paying adjusted contribution rates that target a 100% funding level by the date of cessation through increased contributions in the case of a deficit on the cessation basis or reduced contributions in respect of a surplus.
- where applicable, liaise with the original ceding employer or guarantor and ensure it is aware of its responsibilities, in particular for any residual liabilities or risk associated with the outgoing employer’s membership.
- having taken actuarial advice, notify the employer and other relevant parties in writing of the payment required in respect of any deficit on cessation and pursue payment.

Payment of an exit credit

- If the actuary determines that there is an excess of assets over the liabilities at the cessation date, the administering authority will act in accordance with the exit credit policy above. If payment is required, the administering authority will advise the exiting employer of the amount due to be repaid and seek to make payment within six months of the exit date. However, in order to meet the six month timeframe, the administering authority requires prompt notification of an employers' exit and all data requested to be provided in a timely manner. The administering authority is unable to make any exit credit payment until it has received all data requested.
- At the time this policy was produced, the Fund has been informed by HMRC that exit credits are not subject to tax, however all exiting employers must seek their own advice on the tax and accounting treatment of any exit credit.

4.3 Responsibilities of the actuary

Following commission of a cessation valuation by the administering authority, the Fund actuary will:

- calculate the surplus or deficit attributable to the outgoing employer on an appropriate basis, taking into account the principles set out in this policy.
- provide actuarial advice to the administering authority on how any cessation deficit should be recovered, giving consideration to the circumstances of the employer and any information collected to date in respect to the cessation.
- where appropriate, advise on the implications of the employer leaving on the remaining Fund employers, including any residual effects to be considered as part of triennial valuations.

5 Related Policies

The Fund's approach to exiting employers is set out in the FSS, specifically "Section 7 – What happens when an employer leaves the Fund?"

The approach taken to set the actuarial assumptions for cessation valuations is set out in Appendix D of the FSS.
